Pizza Ordering App(Individual) - Ongoing

Developed a food ordering app that enables users to browse pizza varieties, place orders, and make secure payments. The app supports real-time order management and ensures a smooth and efficient user experience from menu selection to food delivery.

- Technologies Used - React, Next Js, MongoDB

Automated Hydroponic Farming Chamber

(Level 1 Hardware Project)

Developed a system to automate plant growth by integrating sensors and microcontrollers to control temperature, pH, and nutrients. Tasks are scheduled using an RTC module, with real-time monitoring on a display. My contribution involved developing the lighting intensity control system using the RTC module with an Atmega 32 microcontroller.

- Technologies Used - C language, Atmel Studio, Proteus Simulation, EasyEDA, Atmega32, Sensors and Electronic components
